**Abstract.** This paper and concomitant presentation deal with the nature of physical reality beyond the veil of time and firmament. Unfortunately it deals with only one aspect of the result of five decades of ‘One Reality Research’ It is not merely an amalgamation of seven billion plus perceptions of reality. The specific topic and scope this is limited to specific corrections to clock, calendar and compass of the universe. It is based on the premise that there is but one reality - a symphony of sciences and spirituality. Since all knowledge domains including stars, sciences, and scriptures have errors in them One Reality can be gleaned by purging errors from all knowledge domains. Once the errors are purged from each knowledge domain by mathematical techniques of LCM (Lowest Common Multiple) and HCF (Highest Common Factor) as applied to concepts and ideas rather than numbers, what is left is harmonious one reality of the universe regardless of who or what the creator is including big bang, a real or imaginary god. The paper discusses specific corrections to calendars, clocks and compasses and other entities dependent on them such as Latitude and longitude on the globe of the earth. Also included is comparison of (i) CLC-Conventional Leap Calendar; (ii) LCC – Leap Corrected Calendar; and (iii) LLC – Leap Less Calendar which is what the creator created. All types of metrics are included for both CLC and LLC. The paper illustrates the mechanics of converting from one system to another by recalculating important dates in history such as U.S. Independence day of July 4, 1776 under the CLC, Moon walk on July 20, 1969 and many more. Cosmos Ipsa Loquitur (The Universe speaks for itself. The earth and sun both orbit the common barycenter of the two earth in 364 revolutions (days) per orbit and the sun in thirteen earth years. Also included are features such as controversial Sound Bites NOW – Nuggets of Wisdom, Teaser Questions, and TPM –This Probably Means, amusing anecdotes and many other features to spice up the otherwise factual and boring and unbelievable and even bizarre presentation. In fact the scope of the one reality research is so encompassing that it would take many such abstracts.

- (i) One Reality of One Reality
- (ii) Epi-gender and epi-epigenetics as applied to Heteros, Homos you, me LGBTQ and even the twelve apostles
- (iii) The science and engineering of GPS – the Global Positioning System
- (iv) Sleep & Dream Cycles, Stages and Phases (More than a baker’s dozen)
- (v) Nature and limitations of the creator and the timeline of the universe
- (vi) The uniform gravity on opposite hemispheres of the earth, with everyone upright even those down under.
- (vii) Time line and Design of the universe, with its enormity and complexity
- (viii) How the Creator keeps his mission for Man on earth on track, on target and on time, without compromising our freedom to choose by real time management of opposition equilibria and compensatory moves after each of our choices.
